---

efeed is a high capacity real-time data-feed designed to deliver a broad range of data types including:

- ☑ Prices
- ☑ Pages
- ☑ PDF
- ☑ Multi-media – video and audio
- ☑ Exchanges' News and Notice
- ☑ Market News and Market Watches
- ☑ Research
- ☑ Analytics
- ☑ Historical database (over 10 years)
- ☑ Market Depth
- ☑ Bid/Ask Power Meters
- ☑ Broker Queue with Name and No.
- ☑ Time & Trades with specific trade types
- ☑ Groups of related instruments

---

efeed performance averages less than 500 milliseconds from feed source to client site with a maximum throughput to 50,000 active instruments.

Note: The performance for HKEX and HKFE warrant NOT exceeding 88 milliseconds even via Internet in China and Hong Kong, proven to be the fastest one in mainland China.

efeed historical databases span over 10 years in most cases, including life of contract for all major issues.

---

efeed comes with a suite of components designed to simplify the task of developing and maintaining feed handlers. The suite includes:

- ☑ API libraries in C, **.**NET and/or Java
- ☑ Full set of documentation
- ☑ Reference guides
- ☑ Sample feed
- ☑ Sample code & code analyzer
- ☑ Tutorial and assistance
- ☑ Partial or full sub-contracting

---

efeed provides the company profile, background, Business Review and Outlook, Financial Statements, Financial Ratios, Dividend Records, Recent and Live Press conference and Companies Interviews in Multi-media presentation on demand basis.

---

efeed collects one of the most comprehensive brokers' and professional commentaries and analytics for the Sino-markets. You would feel like investing in your home markets and invest like a PRO.

---

efeed can be accessed in all major provinces and cities in China in close-to-intranet environment – thanks to EFO's telecom partners: China Telecom and China Netcom. With the cooperation, EFO provides broadband fiber-optic Internet networks even meeting the VOD quality, hosting and co-location allowing your firm effortlessly and cost-efficiently to complete infrastructure and quick to markets.   .
